priyanshu97mehta@gmail.com | +91-8802868817 | [linkedin.com/in/priyanshu7m/](https://www.linkedin.com/in/priyanshu7m/)

SKILLS

Technical Skills : Python, Java, SQL, JSON

Proficiencies: Problem Solving, Machine Learning (Supervised & Unsupervised), Data Analysis, Data Visualization, Regular Expressions, Web Scraping, Convolutional Neural Networks

Tools and Libraries: MS-Excel, Tableau, Git, Sklearn, Numpy, Pandas, NLTK, OpenCV, Flask RestAPI

WORK & LEADERSHIP EXPERIENCE

Tata Consultancy Services

Developer, Analytics & Insights

November 2020 – Present

- Worked in the Analytics & Insights team carried out **research, data analysis & visualization** and **developed POCs** for various product teams. **Mentored 1 intern** for an internship project.
- Developed an **Unsupervised Machine Learning model** that **automated work of 6 Manual FTEs** to merge similar data points for Logistic company's delivery data. **Decreased processing time by 95% and saved €150K per year.**
- Worked closely with Healthcare ISU to build **AI-powered ICD-10 Medical Coding software in Python** that attracted **2 new businesses**. Improved data extraction pipeline which **increased** working accuracy by **8%**.
- Built string pre- and post-processing module using **NLTK** and **Regular Expressions** for **Information Extraction in Python**
- Improved **image-processing** pipeline using **OpenCV** for **OCR** that improved **~10% precision** in text extraction.

Arbunize Digital Media Pvt Ltd

AI Developer Intern

June 2019 – July 2019

- Worked on building resume parser for information retrieval by using **Natural Language Processing and Python**
- Established connection of resume parser to web application through **REST-API**

Crelytics, LoanVidya

Data Scientist Intern

August 2018 – October 2018

- Built analytical dashboard for bank statements using **Python** and **Django**.
- Improved processing speed by **20%** for report generation through **code optimization**.

PROJECTS

Analysis of Expenditure Pattern

Analyzed and visualized **bank transactions data** from **ANZ Australia** using **Tableau** to understand customer's expenditure behavior.

C3: Customer Churn Classifier

Customer churn classification on **E-commerce data** using **Supervised ML methodologies**. Compared **Logistic Regression, Decision Trees, Random Forest** and **SVM**.

EDUCATION

Guru Gobind Singh Indraprastha University

New Delhi, India

B.Tech in Information and Technology (C.G.P.A - 8.73)

2016-2020

Publications:

- **Communication of Speech Impaired People with Home Automation** - International Research Journal of Engineering and Technology [\[Link\]](#)
- **Methodology for Resume Parsing and Job Domain Prediction** - Taylor & Francis Journal of Statistics and Management Systems [\[Link\]](#)
- **Word-level Sign Language Gesture Prediction under Different Conditions** - Springer AISC series (ICICC) [\[Link\]](#)

St. Xavier's School

New Delhi, India

CBSE - XII - 95%

2016

CBSE - X - C.G.P.A - 10

2014

LEADERSHIP & AWARDS

- **Finalist**, Intel Pop-Up Incubator Hackathon at **TCS (2021)**
- **JK Pal Memorial Award** by **IEEE (2020)** and **Outstanding Student Volunteer Award** by **IEEE (2019)**
- **First Position** at VIT-HACK'19 (36 Hour Hackathon)
- **Chairperson**, IEEE Student Branch (2018-2020)
